

As part of our active programme of collaboration and development of new sector work, ArchitecturePLB developed this complex refurbishment and new build project for Richmond Adult Community College from stage D designs by Duggan Morris Architects.

Our extensive experience designing and delivering complex construction projects, across a range of scales and sectors allowed us to work successfully with all parties to bring the project to completion on site in early 2015.

The project completes phase 1 of RACC's capital development programme which aims to bring together the college's departments to create a single adult learning campus at Parkshot. The new build sections provide three new floors for Richmond Art School, a new state of the art performance centre, and a central student hub. The project also included the refurbishment of the existing Parkshot building including reception, entrance hall and Richmond Business School.

The project was awarded 'Best Public & Education Building' and 'Best Refurbishment' at the Brick Awards 2015.
